

Packing and Unpacking Instructions

UNPACKING

1. Remove the two pieces of foam holding the control unit in position and remove the control unit.
2. Remove the two pieces of 40mm packing material on the sides of the box.
3. Hold the two isolation units (gold coloured) and raise vertically.

PACKING

1. Wrap isolation units in a plastic bag. Place two long foam pieces over the units with a gap of about 140mm between the foam pieces.
2. Hold the isolation units in the middle and place in bottom of box with the cut-outs for the control unit uppermost. Place the two 40mm packing pieces against the sides of the box to locate the foam.
3. Place the control unit in the cut-out in the two foam pieces.
4. Slide the remaining two pieces of foam into position to hold everything in place.
